

Attention: Owners, Landlords and Agents:

The Tarrant County Housing Assistance Office has adopted the following inspection policy procedures, to remain compliant with the Texas Property Code and the Tarrant County Housing Assistance Office Administration Plan:

- A smoke alarm will be required in ALL bedrooms.
- A carbon monoxide detector will be required in all units that have gas appliances.
- A peep hole will be required on all exterior doors (doors leading from the exterior of the unit to the interior of the unit; includes from the garage into the unit), if a window is not within 4 feet of the door. The peephole must have a barrel with a one-way lens of glass or other substance providing an angle view of not less than 160 degrees. A clear glass pane or one-way mirror is also acceptable.
